

Drone protection

SecuriLocate Drone Mini UAV Jammer

The portable drone jammer was developed in response to the ever-growing threat of commercial drones. Approaching drones can be stopped and forced to land in a controlled manner or sent back to the starting point in order to locate the pilot.

The system is very light with a weight of 2,7 kg and does not require any external components. The frequencies relevant to drones can be jammed individually or together.

Highlights

- Range > 1 km
- With 2,7 kg in weight, it is a very light jamming system
- Cover up to 4 bands
- Total output power 32W
- Adjustable output power
- Battery operation up to 80 minutes
- Operating temperature from -20°C to +60°C
- Made in Germany

Features

- 2,4 GHz to 2,5 GHz / 20W
- 1.570 MHz to 1.620 MHz (GPS L1 + GLONASS L1) / 10W
- 5,7 GHz to 5,9 GHz / 2W

Scope of delivery

- Mini UAV jammer
- Power supply
- Transport and storage containers (depending on requirements)
